PROBLEM

Many online quiz applications lack customisation, accessibility, and multilingual support, limiting their usability for diverse users.

SOLUTION

Trivia Fiesta is a browser-based Single Page Application that provides a bilingual quiz system with dynamic questions, timer-based gameplay, and a responsive user interface.

KEY FEATURES

- Category-based quiz selection
- Difficulty levels (Easy, Medium, Hard, Mixed)
- 15-second countdown timer
- Light and dark theme toggle
- Sound effects with toggle control
- Local leaderboard storage
- Custom quiz upload via JSON

SYSTEM ARCHITECTURE

- index.html – main interface layout
- styles.css – visual styling and themes
- spa_logic.js – quiz logic and state management
- helper.js – DOM helper functions
- data.js – dataset loader
- questions_en.js / questions_gr.js – bilingual question sets

TECHNOLOGIES

- HTML – application structure
- CSS – layout and theme design
- JavaScript – application logic
- LocalStorage – leaderboard storage

FUNCTIONALITY

- Fully functional browser-based quiz system
- Questions dynamically loaded from structured datasets
- Timer-based gameplay increases engagement
- Leaderboard scores stored using LocalStorage
- Responsive interface supporting multiple screen sizes

FUTURE IMPROVEMENTS

- Online leaderboard using database storage
- Additional quiz categories and datasets
- Support for more languages
- User accounts and progress tracking
